

## The PT Times

Picton Terminals

10/1/2020

Volume 23

### Spring-Summer News!

#### 2020 Look Ahead:

Picton Terminals invited guests to our port for several **physically distanced, outdoor Information Sessions** to learn about Picton Terminals **zoning, Great Lakes shipping and Great Lakes Cruises**. We were joined by Director Stephen Burnett of the Great Lakes Cruising Coalition, who shared his expertise about the cruising industry and the boutique cruises planned for the Great Lakes. We were pleased to host regional Politicians, Economic Development representatives, Tourism leaders, local media and neighbours who asked questions about our business plans and opportunities for economic growth across the region. Thanks for joining us!

Since July, the **Molly** tug&barge have been making regular trips to Toronto to deliver surplus aggregate to build the 1<sup>st</sup> of 3 breakwaters for the Toronto Conservation Authority. The PT Team will complete Phase 1 before freeze-up.

In September, the **Sheri Lynn S** tugboat&barge began making regular trips to Wolfe Island to deliver surplus aggregate for the new ferry dock.

PT awaits delivery of our **new tugboat**, the Amy Lynn D, this autumn. Fingers crossed that Covid19 delays don't push delivery into 2021.

We are pleased to announce the **Clean-Up Picton Bay Fund** which allows community groups to apply for grants to clean up Picton Bay. The \$40k fund results from the settlement of the legal case against us. Details on our webpage.

### Covid19 Update:

Picton Terminals is CLOSED to the public.

We hope to invite photographers and shipping enthusiasts to watch the Nov2020 arrival of the Federal Katsura

(Physical Distancing etc. will be in place).

Please email

[Sandy@doornekamp.ca](mailto:Sandy@doornekamp.ca)

if you are interested to watch the vessel offloading.

Sailboat launch for neighbours. Photo by PT

As Ontario reopened, the PT Team assisted neighbours to launch their sailboats using our Liebherr 420 shore crane. October haul out is just around the corner.

## Wolfe Island Ferry Dock Project

The PT Team is supplying surplus aggregate in support of the Wolfe Island Ferry Dock construction in preparation for the new MTO electric Wolfe Island ferry. Each barge carries approx. 2500 MT of surplus aggregate (= 60+ truckloads). There will be approx. 50 barge loads this autumn.
