Welcome Sheri Lynn S

Welcoming the new vessel @ PT

Picton Terminals was joined by friends along the St. Lawrence Seaway who photographed and welcomed tugboat Sheri Lynn S on her journey from Montreal to Picton.

Although there were a few delivery delays from Shanghai, once she entered the water in Montreal, it was smooth sailing! The crew guided the new shiny vessel through the locks, had a Prescott pit stop, took a jaunt along the north channel of Amherst Island and slipped into her new Picton home under a waxing crescent moon.

Port of Montreal, by Picton Terminals

"Sheri Lynn S is a key component in our efforts to diversify Picton Terminals"
Owner and CEO, Ben Doornekamp.

Salt is a necessary evil in our automotive-centric world. This is why Picton Terminals is making an effort to reduce salt use via the **FUSION™** line of ice melters.

What's next @PT?

- Received MOECC approval for **Dry Storage** and interim salt storage plan; work is in progress.
- Working with Coverall Tarping to customize and install tarps over the 2017/18 Windsor Salt stockpiles.
- Integrate tugboat Sheri Lynn S into upcoming PT projects.
- **FUSION™** ice melting products.

In 2017, Picton Terminals built a new stormwater management system, addressing the salt water runoff which has occurred on site for over 3 decades. Additional containment ponds were built and a berm was added along our eastern boundary. Collectively, these changes prevent salty water runoff into Picton Bay and adjoining properties.
