New tugboat Sheri Lynn

Welcoming the new vessel @ PT

Picton Terminals anxiously awaits the arrival of the tugboat Sheri Lynn from Shanghai to Picton, via Montreal. We expect her arrival mid-October and are planning an **Open House** to welcome her to Picton Terminals! The new vessel is designed for towing, mooring, pushing and survey operations. The date of the October Open House will be announced on our **Facebook** page.

"I'm excited and honoured to welcome my namesake, the Sheri Lynn - a great addition to the Picton Terminals vision and business plan" Owner and CFO, Sheri Doornekamp.

DAMEN STAN TUG®
1606 ICE

Dimensions :

LENGTH	16.76 m
BEAM	5.94 m
DEPTH AT SIDES	2.54 m
DRAUGHT AFT	2.25 m
DISPLACEMENT	92 ton

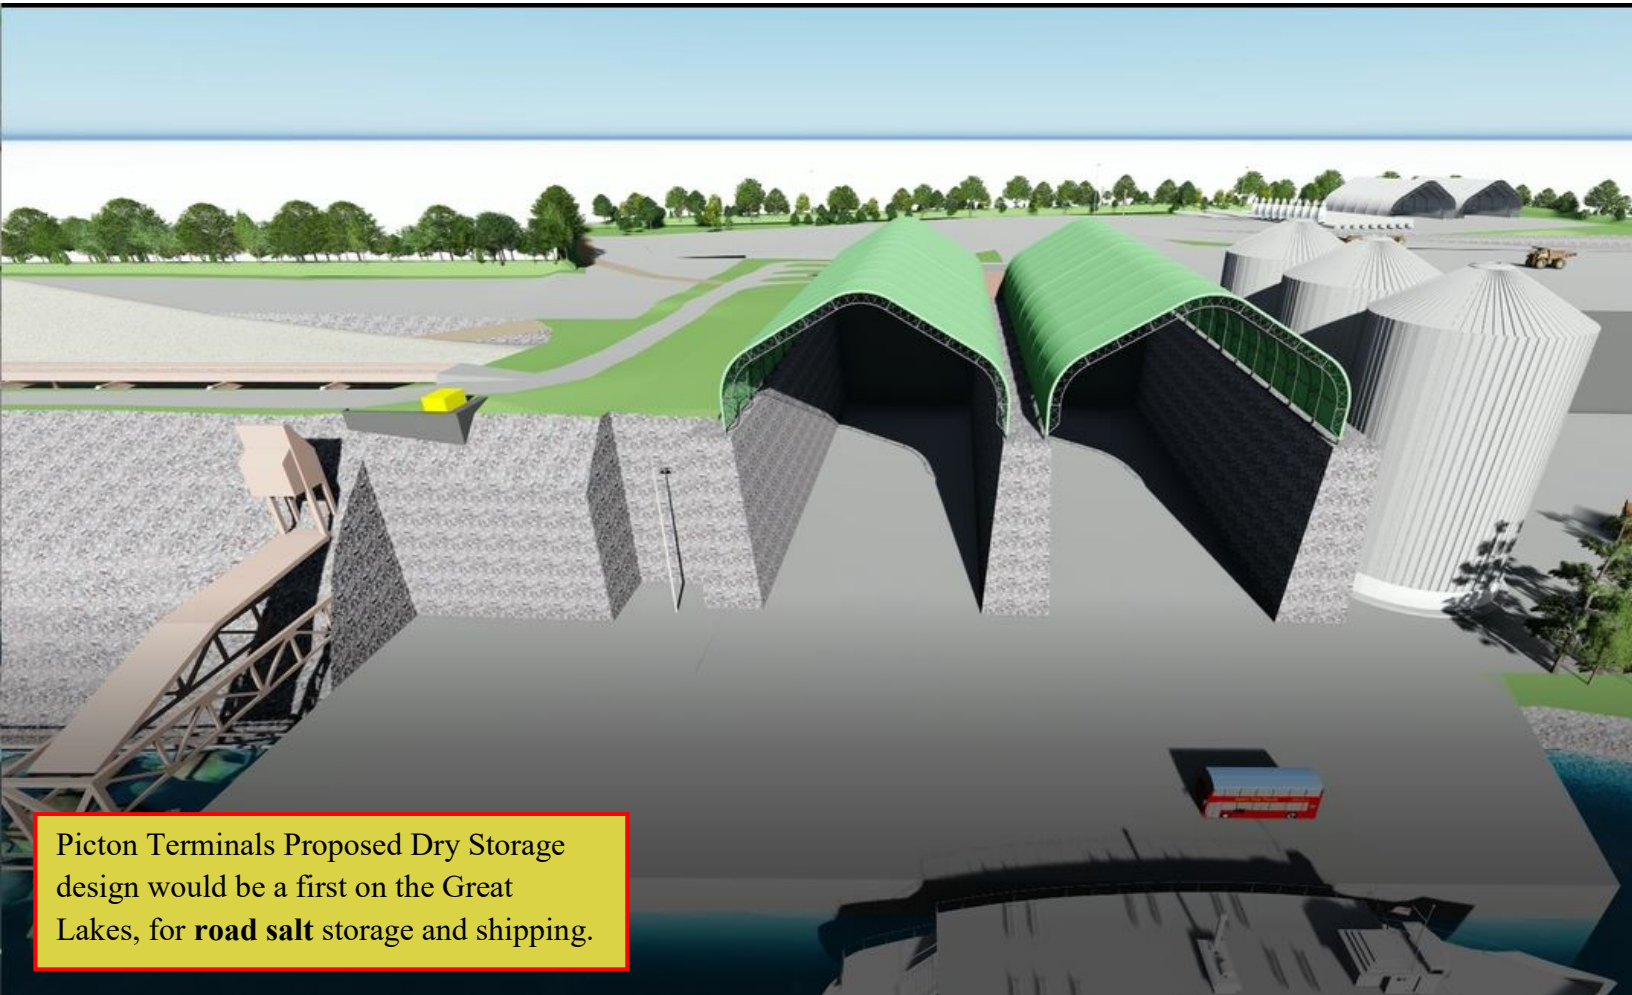

Dry Storage

Picton Terminals has proposed **Dry Storage** to MOECC which incl. a permanently 100% covered conveyor system and hopper (see photo). Conveyor system will be fitted to allow self-unloading vessels to place discharging conveyor inside coverall, thus placing material into receiving hopper inside coverall structure. Conveyor system will transfer material at a rate of 2000 MT/hr to inland end of coverall structure. Structure will store approx. 100,000 MT while still maintaining space to load trucks inside the coverall. All truck loading will be done inside the coverall structure. All onsite **salt** handling operations will be done within the dry area inside coverall structure.

What's next @PT?

- Waiting on MOECC approval for **Dry Storage** (see details and photo below)
- Landscaping plans (incl tree planting, native species etc)
- Installing Artificial Barn Swallow Nesting Structures and preparing Spring Monitoring plan

Picton Terminals Proposed Dry Storage design would be a first on the Great Lakes, for **road salt** storage and shipping.
